

DR E V RAPITI

Pull out of the WHO NOW

On the 24th, May 2023, our government, without our knowledge, will sign in favour of amending the International Health Regulations, which will hand over all power to the incompetent WHO, headed by Dr Tedros, a wanted political revolutionary from Ethiopia. These amendments will give full power to the WHO, which messed up the Covid pandemic, to 1) declare a pandemic at any time, 2) lock down our country as it pleases 3) mandate vaccines without our permission and 4) violate our Constitution by totally disregarding our human rights and dignity, when they decide on any policy on health for our country. We did not fight so hard for our freedom, for the ANC to hand over our country to an unelected WHO, without our permission, at the stroke of a pen with the support of all our silent, shameful, and selfish elected politicians. Please support an urgent call to force our government to withdraw from the WHO immediately.
