

Dr Stone, a heroine, not a villain

Today, the 3rd, November, 2022, will be sadly remembered by medical historians, the people of Zimbabwe, and the enlightened and just world, as a bleak and dark day in the history of medicine, when one of the greatest daughters of Zimbabwe, Dr Jackie Stone, will go on trial, at the medical board of Zimbabwe, as a common criminal, instead of being celebrated and decorated, with the highest medal of honour, for saving millions of Zimbabweans from dying of Covid.

Dr Stone, according to the medical board, is guilty of a major crime because she used safe, highly effective and highly affordable repurposed drugs to save millions of people from dying of Covid, without requiring hospitalisation or supplementary oxygen.

For the first time, a doctor is being charged for saving lives. We are certainly living in strange times when the utterly bizarre is accepted as the norm. Has the world gone mad!!!

Through Dr Stone's highly successful protocol, Zimbabwe experienced almost zero deaths from Covid, at a time, when hundreds of thousands of people in the West, America,

Australia and New Zealand were dying, without any proper treatment because, these countries, refused to follow Dr Stone's highly successful protocol to treat Covid.

The so-called developed world was struggling to prevent people from dying of Covid using prohibitively expensive and toxic drugs like remdesivir, paxlovid, malnupiravir and monoclonal antibodies, while doctors in Africa, Asia and South America were saving millions of their citizens from dying of Covid using similar protocols to Dr Stone.

Dr Stone used Ivermectin, colloidal silver and Doxycycline, all of which, have a proven track record for safety and efficacy, with over a forty year history, unlike the newly developed remdesivir and paxlovid, which are emergency use authorisation drugs, that have not been properly tested and have been shown to have severe side effects and poor efficacy, compared to Ivermectin.

Ivermectin, is on the WHO's essential drug list and has one of the best safety profiles amongst all drugs; it is safer than paracetamol and ibuprofen and far safer and far less expensive than the highly toxic remdesivir or paxlovid.

Over 4 billion doses of Ivermectin have been used on about 40million people in Africa, parts of Asia and South America to eradicate River blindness apart from being an anti-helmenthic drug.

The creators of the drug, Dr Satoshi Omura and Dr Campbell, won a Nobel prize for their discovery in 2015, so the opposition to this proven drug by the thinking members of the medical fraternity is hard understand.

This drug was and is regarded as a wonder drug for its safety, efficacy and versatility by the honest, enlightened and untainted members of the medical fraternity all over the world, except for doctors, who are surrogates of big pharma and the Bill and Melinda Gates foundation, both of whom, it is well known, are heavily involved in the dishing out of 10 billion doses of an untested and toxic artificial protein, erroneously described as a "safe and effective vaccine". With all the evidence that is emerging, we know that these jabs far from safe and effective.

Ivermectin is known to have antiviral, anti-inflammatory and

anti-thrombotic properties in addition to being a good immuno-modulator, effective against conditions like psoriasis.

The Zimbabwean board of doctors need to be reminded, before they sentence Dr Stone, that doctors have a right, according to the Helsinki declaration, to use any drug at their disposal, to treat their patients, as long as the drugs are safe .

This right of the doctors to follow the Helsinki declaration supercedes the authority of any regulatory authority, academic institution or government agency, so Dr Stone, along with thousands of doctors around the world, who used Ivermectin to treat and save millions of lives, acted in accordance with the Helsinki declaration of 1987.

The Zimbabwean medical board is guilty of violating Dr Stone's rights to treat her patients as she saw fit, in accordance with the Helsinki declaration.

It is the board that should be put on trial, and not Dr Stone.

Dr Stone, who has saved millions of Zimbabweans and

shared her experiences and knowledge throughout the world, should be celebrated for her outstanding services to humanity, as a heroine and humanitarian, all over the world and in medical history, during one of our worst crisis, and should not be treated like an ordinary villain or like a doctor from the Nazi era. It is the gravest insult to a doctor of her integrity.

The Zimbabwean board, who clearly have no clue on how to manage Covid, want Dr Stone to be sent to prison to teach other practitioners a lesson not to do the "right thing". Clearly, these pseudo-doctors on the board, are not in favour of "doing no harm" , so are grossly unfit to sit in judgement of this great doctor.

I have learnt from her experience on the safety of high dose Ivermectin and have saved thousands of lives, so, am I a criminal as well for saving lives?

Anyone, who dares to make such an accusation against doctors, who saved people's lives will have to face the wrath of thousands of people, around the world, who successfully recovered, using our effective protocol.

I wish to make an urgent and fervent plea to President Mngagwa, the president of Zimbabwe, to please intervene on behalf of one his country's greatest citizens, Dr Jackie Stone, who has put his country in the hall of fame for saving millions of people from dying of Covid through her simple protocol.

I urge medical professionals and citizens of the world, to stand in solidarity with this great doctor to ensure that justice is done. If Dr Stone is wrongfully indicted by the Zimbabwean medical board, on a false and unscientific premise, Zimbabweans, its president and its medical board will be remembered in history as the worst criminals, who punished their greatest heroines of Covid for saving millions of Zimbabweans.

History, will never forgive those who have vilified Dr Stone, so unfairly and unjustly. I sincerely hope that sanity will prevail today, and that the true criminals, in the medical profession, who failed the world will be punished, and good, ethical, astute doctors like, Dr Stone will be rightfully honoured and decorated.

Dr Stone is and will be remembered as the heroine of Covid treatment, regardless of her sentence, today, not just by Zimbabweans but by people throughout the world.

Take heart, brave soul, I salute you.

I am an ardent admirer of your work.

If your country fails you, the rest of the world will honour you.

Dr E V Rapiti
