

**\*\*Prof Masayasu Inoue's warning about the toxic mRNA vaccines - by Dr Rapiti, April 1st, 2024, Cape Town\*\***

Prof Masayasu Inoue, an emeritus Professor in molecular pathology and medicine from Japan has made a clarion call to his government and the world to halt the use of mRNA technology, that uses viral proteins to produce vaccines.

He refers to this mRNA technology, where the vaccine is injected into the arm as untested toxic gene therapy.

He made this statement after he visited factories in Japan, where the Japanese government employed over a hundred scientists to produce vaccines using the mRNA technology to prepare the country for future epidemics.

**\*mRNA vaccines to be produced in 100 days without proper testing\***

The vaccines will apparently be produced in about 100 days, without undergoing rigorous testing through all the phases to ensure the safety and efficacy of the vaccine.

If vaccines are not going to be put through proper testing

then how would it be possible to obtain proper consent because in order to obtain proper consent, a scientist or vaccinator has to be fully aware of the contents, efficacy, safety and purpose of a trial drug or vaccine. 100 days is far too little to obtain all the information required to know about the safety and efficacy of a drug or vaccine.

It normally takes five to ten years to produce a vaccine after it goes through rigorous testing.

\*Administering vaccines without proper consent is a gross violation of human rights\*

I fully agree with Prof Masayasu that for any scientist or government to compel citizens to take a vaccine or drug that has not been properly tested is a gross violation of human rights, and in my opinion that of the Nuremberg code and our constitutional right to bodily integrity and privacy.

\*Japan plans to mass-produce mRNA vaccines in a hurry\*

Japan is building a number of factories to mass produce vaccines for the purported disease X, which is really a figment of the imagination of the fertile mind of Dr Tedros from the WHO.

Japan seems to be following the policy introduced by CEPI (Coalition for epidemic Preparedness ), which was founded in 2017 by the unaccountable WEF and the Bill and Mellinda Gates foundation to manufacture vaccines, rapidly, within 100 days.

CEPI is headed by Richard Hatchett, who once worked for the obnoxious Dr Anthony Fauci.

We should be highly suspicious of anyone who worked with the dishonest Dr Fauci, who had no qualms about lying to the US senate that the Corona virus was not produced in a lab in Wuhan. He also denied that it was produced through the illegal gain-of-function process and that he did not fund it.

\*Dr Fauci lies to the US senate\*

Dr Fauci, it was discovered, was not only aware of the dangerous practice of gain of function in the Wuhan laboratory but it was also established through tons of emails, he funded gain of function in the Wuhan lab via Dr Peter Dazak, CEO of the disreputable Echo labs.

\*Why are we still so obsessed with the failed mRNA

technology\*

After the disaster we had experienced from the COVID mRNA vaccine through the number of unexplained sudden adult deaths; with over 20 million deaths associated with the vaccine rollout, according to data analyst, Peter Halligan, and the sudden unexplained spike in turbo cancers observed by top oncologist, Prof Dalgleish, why would any right thinking government invest in such dangerous mRNA technology, for a disease that may never appear, and if it does, would be no worse than the ordinary common flu boggles the mind.

\*Why is Bill Gates involved in our health?\*

Bill Gates made a 200 billion dollar profit, according to some reports, from his investment in the Covid mRNA vaccines. He later dumped all shares with a statement that the vaccines didn't save the world as he had hoped it would. Why should anyone or any government trust Bill Gates and the organisation, CEVI, which he is one of the main funders is the question we should all be asking.

It is pretty obvious that Gates's interest in healthcare, vaccines and food technology is primarily driven by his

insatiable greed for money and not because he cares for society.

\*We must put an end to "gain of function" experiments\*

I fail to understand the world's obsession with investing in the new technology like the toxic mRNA vaccines when our focus should be to end the outrageous and criminal practice of gain of function experiments on viruses and germ warfare.

\*What is gain of function?\*

It is important for ordinary people to familiarise themselves with what gain of function is because this dangerous practice is carrying on unimpeded in many private labs in the world, without a word of protest from our regulatory authorities.

Gain of function is a process where scientists take a relatively safe virus and modulate it with the aim of making it more virulent, as was done with the mild Corona virus.

The question we should be asking is: why would any

scientist with an ounce of integrity engage in an experiment that could create a deadly virus that could destroy the world?

There are two reasons for this from the way I see it. The first reason is that the world is overpopulated with scientists, who cannot be employed by the state and they cannot fend for themselves. These unemployed or unemployable scientists are easy prey for rich businesses that use them to create serious diseases through which they can profit from their untested remedies, like the mRNA vaccine, which is the second reason.

\*Vaccine immunity short-lived and toxic\*

The Covid mRNA experimental toxic gene therapy has been a colossal failure for a variety of reasons. Amongst them was the fact that the COVID vaccine immunity waned after two months, prompting the the bad untested policy to introduce boosters.

Data from the UK has revealed that 90% of deaths and hospitalisations occurred in the heavily boosted, so what was the point at all in using these jabs.

Besides not being effective there have been a number of severe adverse events, including death, that has been associated with these jabs.

\*Ethical scientists are a minority\*

I wish to express my admiration for Dr Paul Alexandra, an outstanding ethical scientist and analyst, who displayed the moral fortitude to refuse Pfizer's offer of one million dollars and a monthly salary of fifty thousand dollars to work for them on ethical grounds.

\*Pfizer sponsored scientists, highly unreliable\*

Dr Alexander rejected the offer because he knew that Pfizer's intentions for the huge financial offer was to gag him from speaking the truth about the COVID vaccines and the failed lockdown policies of the government.

Dr Alexander took a huge financial knock for his stand against corruption but his abiding respect for his ethics and for his Hippocratic oath to do no harm compelled him to

make the sacrifice for the benefit and wellbeing of society.

**\*Dr Alexander and Prof Inoue stand tall\***

These two scientists along with a large group of ethical doctors from around the world have no peers, when it comes to integrity and honesty.

I salute Prof Masayasu Inoue, Dr Paul Alexander and the thousands of other physicians in the world for standing up for society and for their ethics by calling for an end to the rollout of this mRNA jab.

They stand head and shoulders, above their fellow scientists, who unashamedly destroyed the lives of so many people around the world by selling their souls for a few ounces of silver to promote a toxic product.

**\*We need to get rid of the corrupt\***

The world as we knew it or thought we knew it, will never be the same again until we make an earnest effort to get rid of the corrupt pharmaceutical industry, corrupt politicians, the

psychopathic Bill Gates from interfering in our healthcare, and limit the number of food-eating scientists, who put themselves on auction for big pharma to buy for the soul purpose of harming society just to satisfy big pharma's endless greed for profit through whatever means.

Dr E V Rapiti

Cape Town
