

## Stop The SHOTS

Dr EV Rapiti, GP, Cape Town

Dear friends, colleagues and citizens in pursuit of justice for victims of the job and human rights, our brilliant and dedicated medico-legal team for STOP THE SHOTS case, Adv Sabelo Sibanda, attorney Riekie Erasmus, (attorney/journalist/mediator) Shabnam Palesa Mohammed, Dr Faghrie Hassen, (molecular scientist), Dr Faan Oosthuizen, the main driver behind this case and myself had a robust three hour meeting last night to iron out several pertinent issues to present our case to the court in a most effective manner with bundles of affidavits from members, treating Covid, job injuries and a special interest in justice.

Amongst the issue that was finalised was the right type of account for this historical project for the benefit of the whole of society.

We agreed on forming an NPC which will serve the purpose of giving you, the donors, peace of mind that the funds are safe, will be used appropriately to get value for your money, every expense will be accounted for with absolute transparency, donations will be tax-deductible and finally the account will be open to anyone in a spirit of transparency.

A case of this magnitude is going to be costly because the case is going to be heard in, Pretoria, so travelling and

accommodation costs will be added to the expenses.

I would like to thank the lawyers and doctors on this committee for so generously giving several hours of their time in meetings and from their personal family time to prepare this case without being paid at all, out of a sincere commitment for the cause.

We are pleased that several other attorneys have agreed to offer their services gratis to help us in our cause.

Funds can be deposited into the trust account held at Grindrod bank, in the interim, with your full name unless you wish to remain anonymous, till the NPC account is open.

A big thank you to all the other doctors from STS for offering their assistance with case histories at no charge.

This is a fervent appeal to all of you, who are in favour or justice being done and your constitutional rights being protected to donate to the fund, which is urgently needed to defray expenses as we fast approach our court date.

I, personally, would like to commend the entire team for

their outstanding work, compassion and ethical conduct in trying to expedite this very urgent life and death matter to stop a Jab that has not been tested, is highly toxic, with a death rate of 1200 people, according to the Pfizer documents, and which is totally ineffective against the latest but extremely safe kraken strain.

We also hope that the courts will not slap us with the costs should we lose because, to do so would be punishing you, the public and donors, for trying to seek justice. A public that is already suffering from the burden of the latest 32% hike in electricity from the bungling load-shedding Eskom.

On behalf of the committee, I wish to thank you all for steadfastly being behind our team. Your support and blessings are highly appreciated.

We would like to urge creative members of the public to come up with thoughts and ideas to run a campaign to support our worthy court action via comments on our stoptheshots page on whatsapp and telegram.

Your efforts to help us will make a huge difference in the

outcome of this case and millions of people, who have been adversely affected or lost their lives because of these untested jabs.

We hope to make our initiative a world wide movement for justice and put our country on the map again for the right reasons, Justice for all.

Dr Rapiti
