# VIBRATIONAL HEALING

The image features two hands held in a gesture of healing or energy work. The hands are positioned on the left side of the frame, with the fingers slightly spread and palms facing each other. The background is a bright, hazy sky with soft, white clouds, suggesting a sunrise or sunset. The overall tone is warm and serene. The text "energy healing" is overlaid on the right side of the image in a blue, sans-serif font.

YOU ARE NOT A PHYSICAL BEING IN A PHYSICAL UNIVERSE

YOU ARE A VIBRATIONAL BEING IN A VIBRATIONAL UNIVERSE

YOU ARE BOTH A TRANSMITTER AND A RECEIVER OF ENERGY

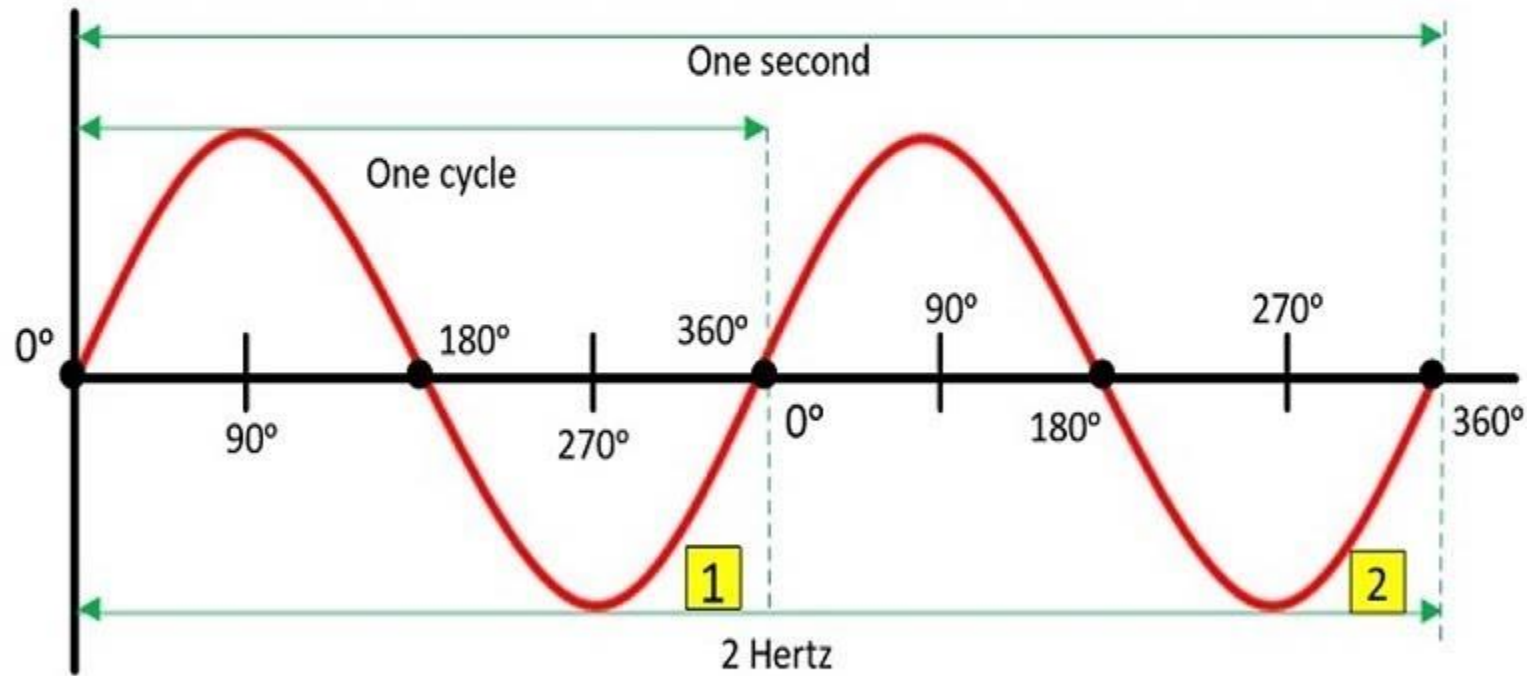

ONE OF THE GREATEST CHALLENGES OF HUMAN BEING IS  
**LEARNING HOW TO LIVE AS A VIBRATIONAL BEING IN A VIBRATIONAL UNIVERSE**

## What is Wave?

Wave is a vibration which carry energy in it.

# What is Frequency?

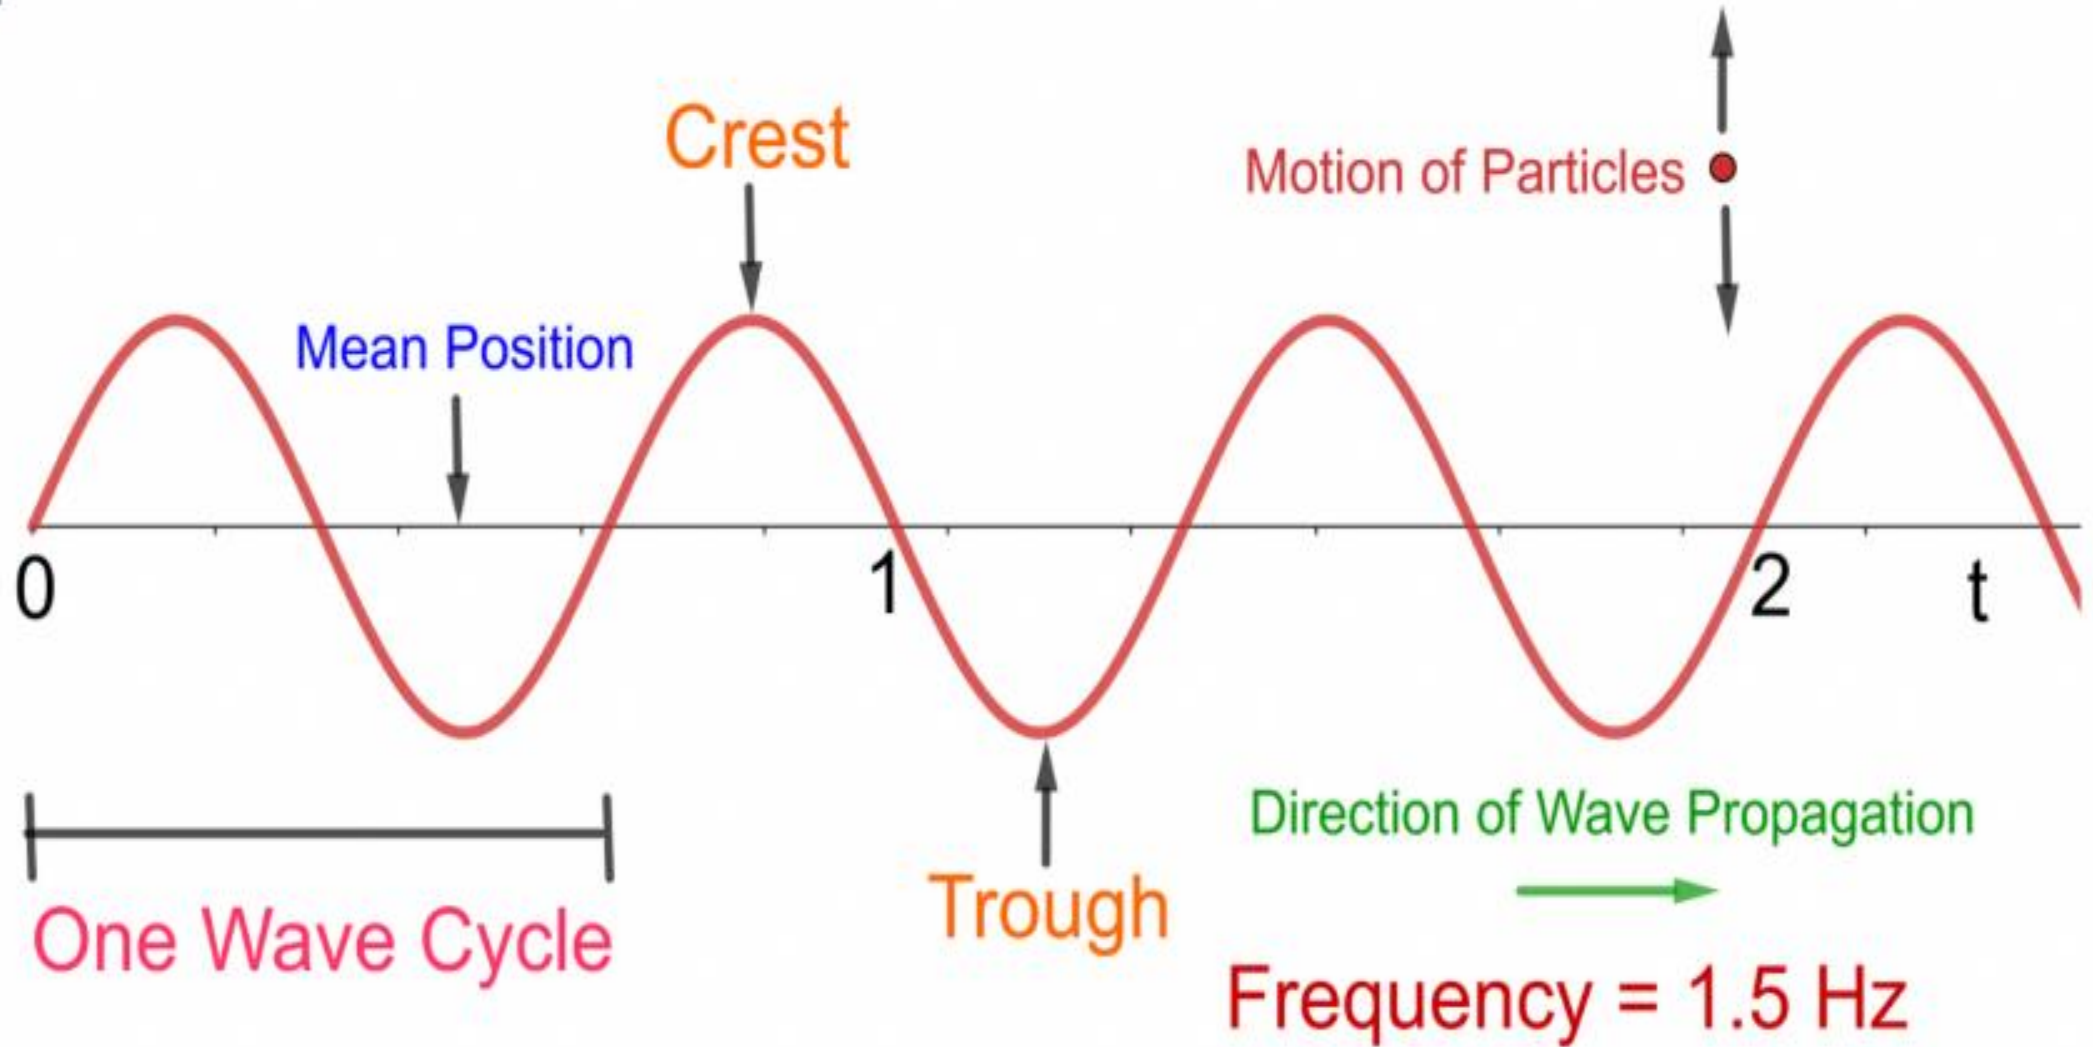

# What is Frequency?

The number of cycles made per second by an alternating quantity is called frequency. It is measured in cycle per second (c/s) or hertz (Hz) and is denoted by (f).

***Background  
of  
Vibrational Medicine***

‘Vibrational medicine’ is a term popularized in 1988 by Dr. Richard Gerber’s book which surveys the whole range of the subject.

# **Vibrational medicine for the 21st century : the complete guide to energy healing and spiritual transformation**

by Gerber, Richard, 1954-

‘Vibrational medicine’ refers to an “evolving viewpoint of health and illness that takes into account **the many forms and frequencies of vibrating energy that contribute to the “multi-dimensional” human energy system.**

- **Presents the body as a complex, integrated life-energy system**
- **Explores the role of thought in health and illness**
- **Describes several vibrational healing modalities, including homeopathy, acupuncture, Chinese medicine, flower essences, color and light healing, magnetobiology, radionics, distant healing, and varieties of hands-on healing**

Publication by James  
Oschman in 2000  
which adds valuable  
insights to Gerber's work.

A second work, **Energy Medicine in Therapeutics and Human Performance**, provides many deeper insights into the subject.

**E=MC<sup>2</sup> Frequency, Wavelength, Color Spectrum**

**What exactly is Essential Energy?**

- ⇒ It is essential or necessary for health and wellness and life in general
- ⇒ Also known as *Chi* in China, *Ki* in Japan and *Prana* in India
- ⇒ When flowing freely through the body health and wellness is good and when blocked illness and disease results
- ⇒ Free flow throughout the body results in feelings of vitality and well-being

**Not recognized by conventional medicine  
but does exist**

# **THE SUBCONSCIOUS MIND**

**What it is and How  
to Reprogram it  
Using Advanced

# WHAT IS THE CONSCIOUS MIND?

**My definition:**

**The conscious mind is a product of a *fully functioning* living brain and is characterized by the ability of the brain to be aware of various brain and body functions such as thought, emotions, feelings, sensations, behaviours etc and to execute certain functions such as thinking, concentration, remembering, exercise of free will etc**

A glass fishbowl sits on a wooden table. Inside the bowl, a white egg is visible. The background shows a laptop and some green plants. The scene is lit with warm, golden light.

***The conscious mind is not  
consciousness but a reflector of  
consciousness***

***It is like a mirror which is not light  
but a reflector of light***

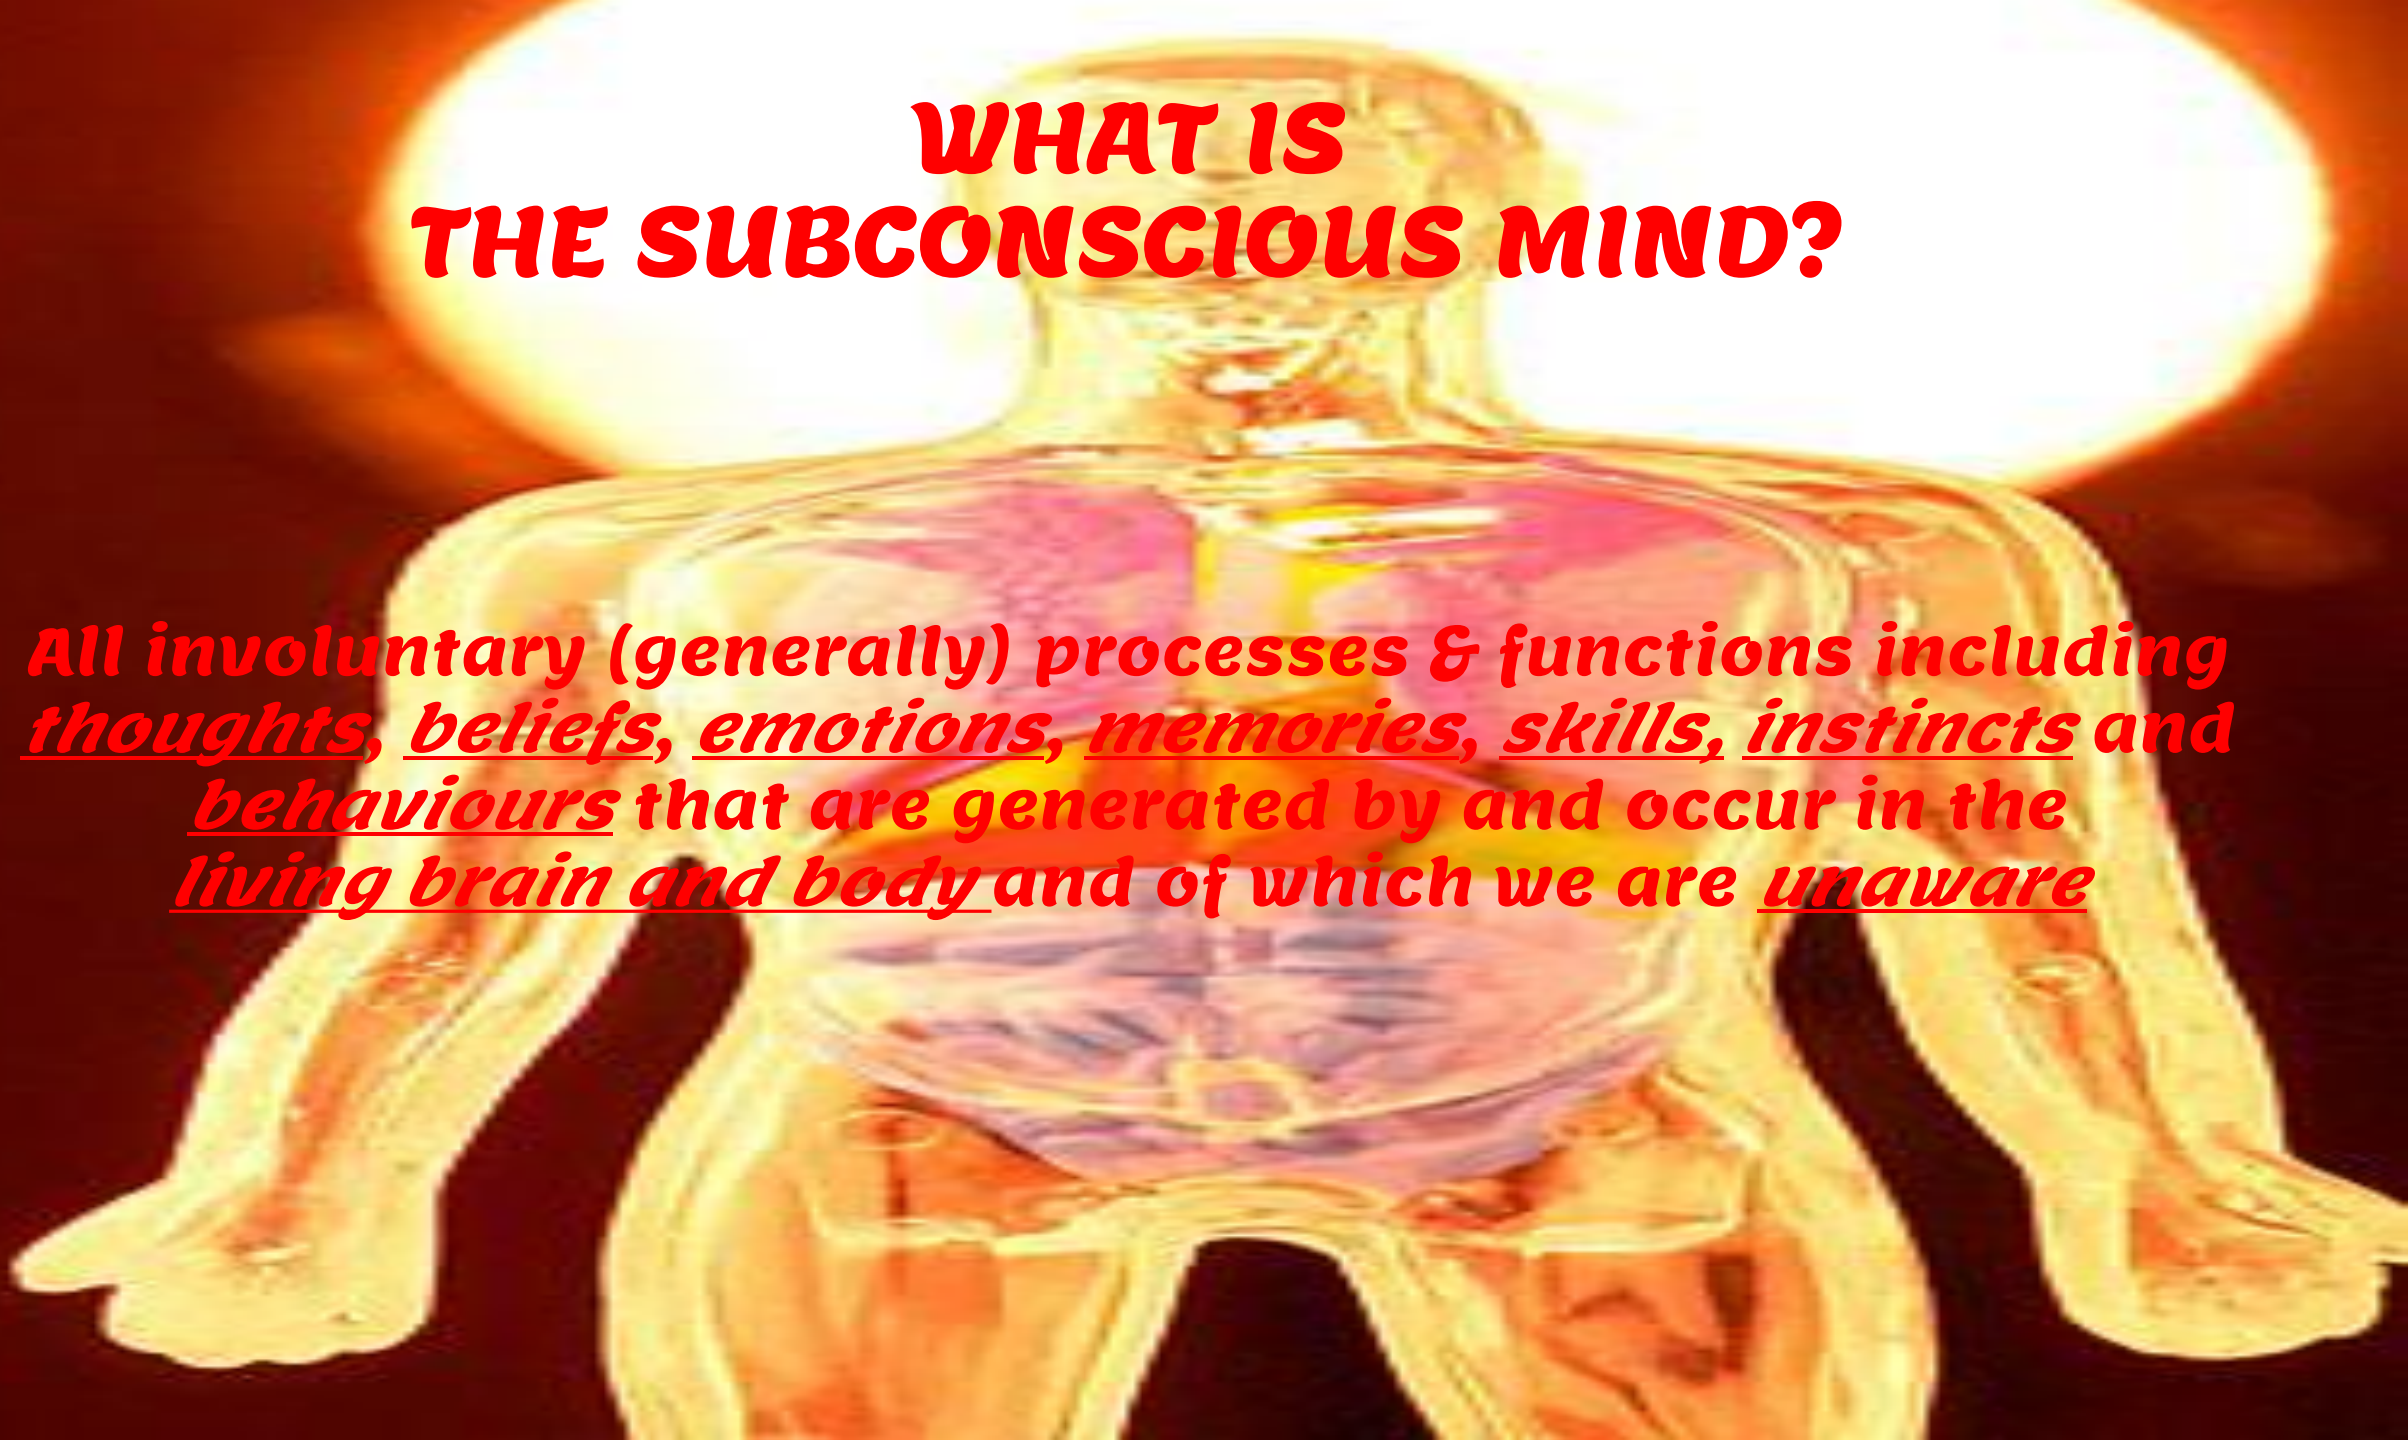

# CONSCIOUSNESS

The ability of a being to recognize patterns and meaning with respect to events taking place, both within oneself and in the realm in which the self exists and operates.

**HOLISTIC CONSCIOUSNESS =  
ENVIRONMENTAL CONSCIOUSNESS + SPIRITUAL CONSCIOUSNESS**

# WHAT IS THE SUBCONSCIOUS MIND?

*All involuntary (generally) processes & functions including thoughts, beliefs, emotions, memories, skills, instincts and behaviours that are generated by and occur in the living brain and body and of which we are unaware*

Harry Massey with Prof. Fritz-Albert Popp

- 
- **Biophotons are weak photon emissions within biological systems**
  - **They are weak electromagnetic waves in the optical range of the spectrum i.e. they are a form of light**
  - **Found in the cells of all living things**
  - **Originate from and stored in DNA molecules and have a coherent laser-like nature**

- 
- The background of the slide features two hands, palms facing each other, that appear to be glowing with a bright blue light. The hands are positioned on either side of the central text, with the fingers slightly spread. The overall effect is ethereal and scientific, suggesting energy or light emission.

# *What are beliefs?*

**Instructions coded and stored in the cells of the nervous system (neurones) and the body and in the bio-information Energy Field**

# ***What are beliefs?***

***Similar to a software programmer who writes instructions into a computer program on how the computer should run or operate...***

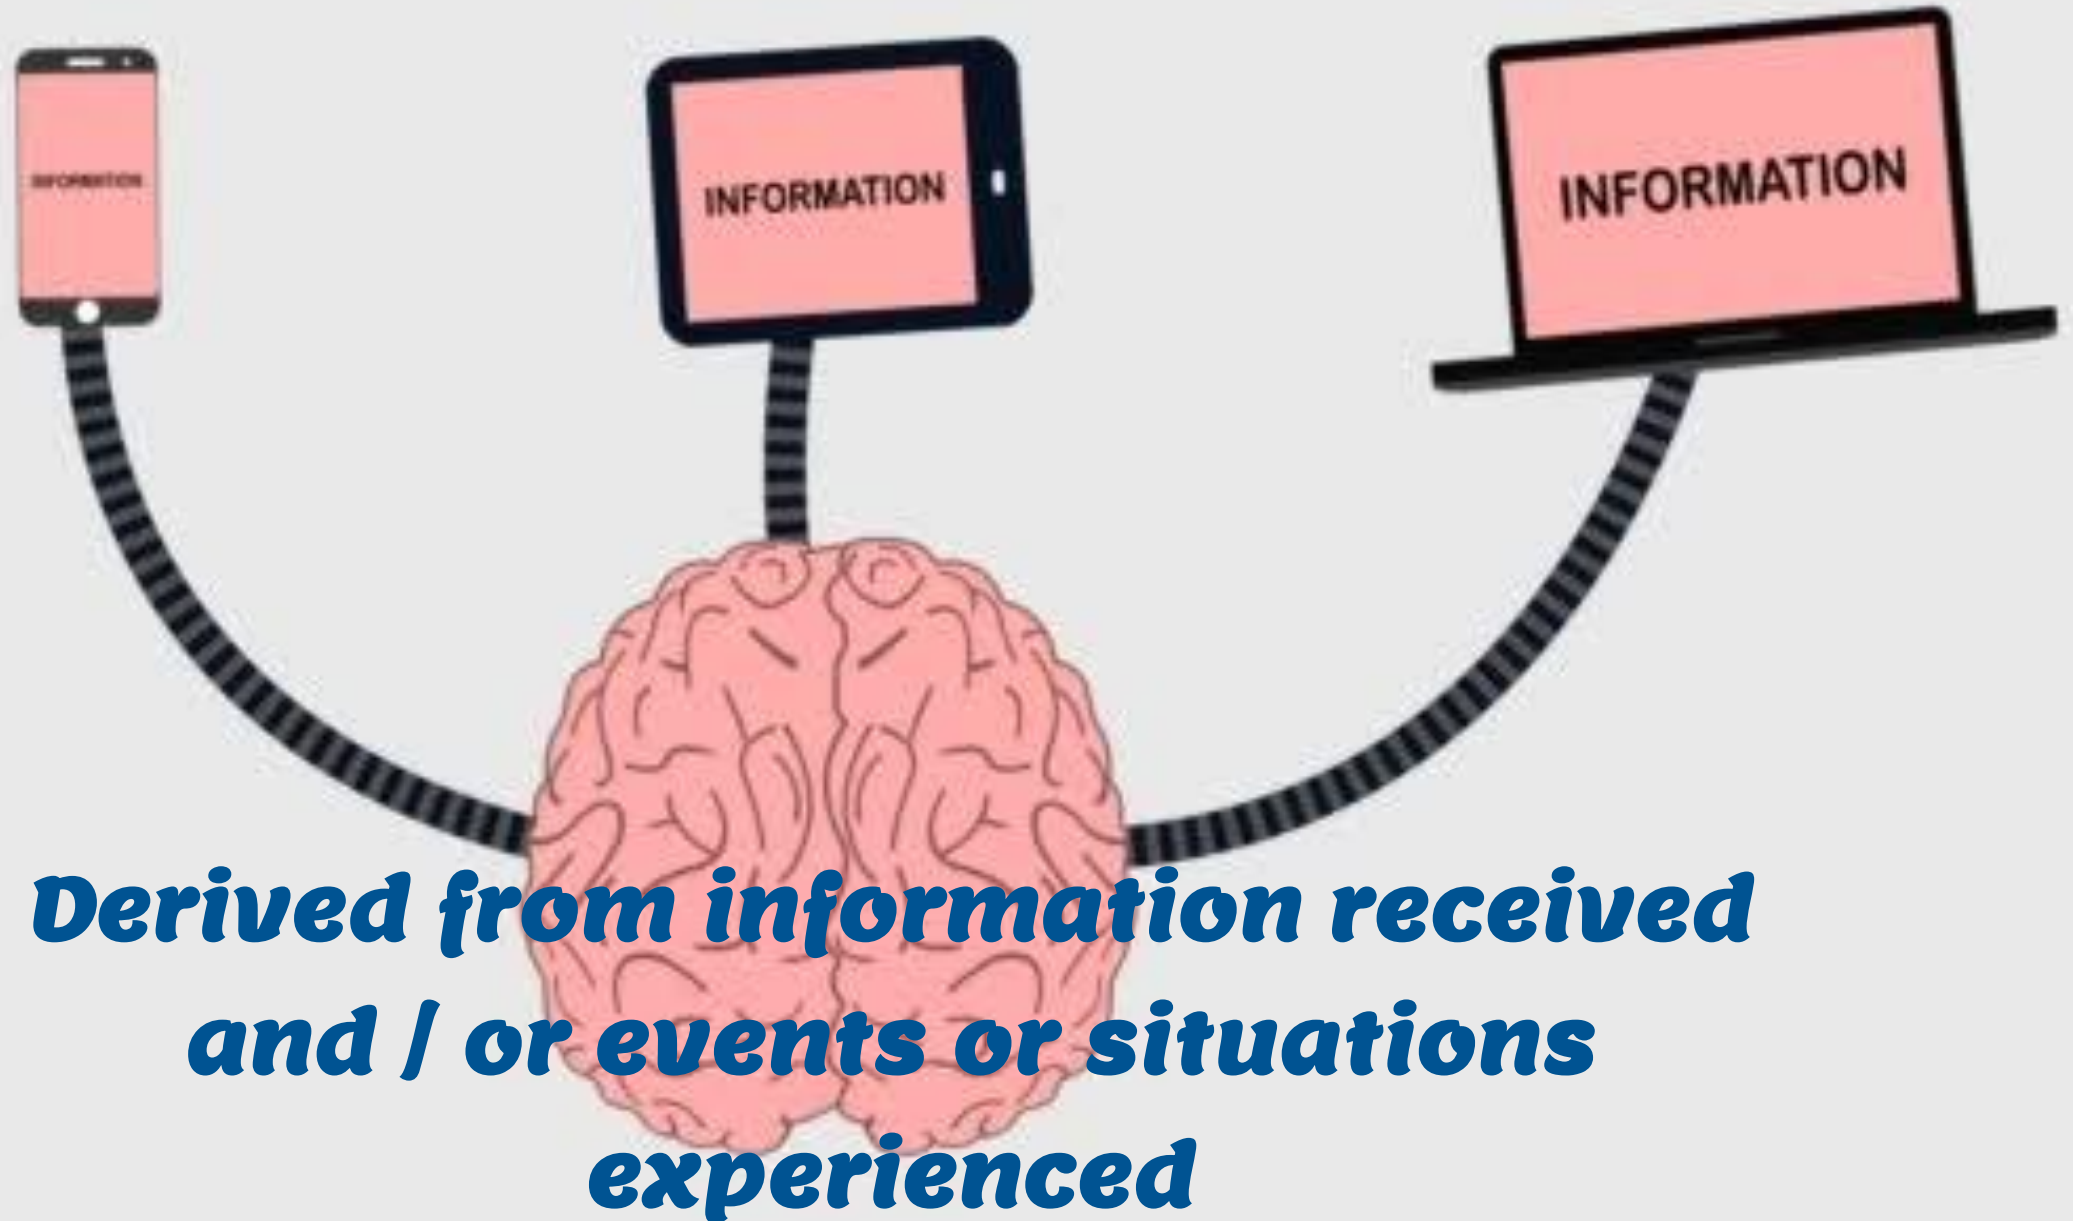

# ***What are beliefs?***

***so beliefs are instructions as to how we should feel, think, act / behave i.e. how our lives should operate***

# ***Where do beliefs come from?***

***Derived from information received  
and / or events or situations  
experienced***

# *What is perception?*

*Perception = awareness of the environment via feelings and sensations (sensory experiences)*

***Our lives & behaviour are really about  
responding to the environment:  
No stimulus – no response***

***But how we respond depends on  
how we perceive the environment***

**So perception creates our experience of the world around us**

**But why do perceptions differ?**

**Because they are influenced by our beliefs**

**So beliefs control behaviour through influencing perception**

**Beliefs act as filters**

# TRUTH vs. PERCEPTION

Perception Is NOT Reality.  
But our Work is to align the two.

***One's level of consciousness pertains to how frequently one's perceptions are aligned with reality (the Truth)***

In early September, 12 people were killed in South Africa after mobs of locals went on a rampage, targeting foreign-owned businesses in the latest wave of xenophobic violence that spread across three cities.

## Abstract and Figures

Local governments in South Africa have experienced leadership challenges in the democratic South Africa. Poor leadership ethics have badly contributed in the leadership challenges in the South African local government system. The objective of the study was to identify the factors that contribute in the poor leadership ethics in local government and the consequences of bad behavior by local government leadership and employees. Mixed research methodology was applied in the study. Primary data was collected through self-administered questionnaires that were personally administered by the researchers to 10 portfolio managers, 333 Employees and interviewed 9 executive managers. The study found that the poor systems to fight against corruption and unethical activities compromise public service delivery and paint all public sector officials as corrupt people. The idea of getting into government institutions for the purposes of self-benefit is dominant amongst many people who are in government institutions.

# ***Age-related Macular Degeneration***

**Normal**

**Macular degeneration**

**Age-related macular degeneration (AMD) occurs when a part of the retina called the macula is damaged.**

**Central vision is lost and fine details cannot be seen. Peripheral (side) vision will still be normal e.g. you might see a clock's numbers but not the hands.**

**AMD is very common. It is a leading cause of vision loss in people 50 years or older.**

## Two Types of AMD

### Dry AMD

About 80% (8 out of 10) of cases of AMD.

Tiny clumps of protein called drusen grow under the retina.

## Wet AMD

**Less common but much more serious.**

**Occurs when new, abnormal blood vessels grow under the retina. These vessels may leak blood or other fluids, causing scarring of the macula.**

**Vision is lost faster with wet AMD than with dry AMD.**

A fundus photograph of a human eye, showing the retina and optic disc. The image is circular and has a reddish-orange hue. The optic disc is visible on the left side, and the retinal vessels are branching out across the field. There are some yellowish spots scattered across the retina, which could be indicative of age-related macular degeneration (AMD).

## Who Is at Risk for AMD?

- Overweight people
- smoke cigarettes
- Over 50 years old
- Have hypertension (high blood pressure)
- Have a family history of AMD
